Forecast for Tuesday 03 Jan 2023

Weather: Snow will spread northeast overnight, becoming heavy for a time before turning to rain below 600m and easing during the morning. Drier for a couple of hours during the middle of the day before rain arrives from the southwest during the afternoon, preceded by snow above 800m. Rain becoming heavy and persistent with a thaw setting in as conditions turn milder.

Chance of cloud-free hill tops above 800m: 10%.

Low Cloud and visibility: Extensive cloud and fog above 500 or 600m for most of the time, although bases lifting slightly for a time in the middle of the day. Whiteout conditions on the tops with blizzards in the morning and blowing snow. Below the cloud, mainly poor visibility but good for a time during the drier spell.

Met Office Aberdeen Meteorologist's View

Low cloud and snow will give whiteout conditions on the tops with very difficult conditions for navigation. Milder conditions late in the day so rivers will start to rise from rain and thawing snow.

Forecast for Wednesday 04 Jan 2023

Weather: Heavy rain will clear overnight. A cloudy morning with occasional showers, falling as snow above 800m, and accompanied by strong westerly winds. Showers and winds easing in the afternoon with some bright spells.

Maximum wind: West or Southwest 30 to 40mph with gusts 50mph, easing to 20mph gusts 30mph.

Chance of cloud-free hill tops above 800m: 20% in morning, becoming 80% in afternoon.

Low Cloud and visibility: Frequent cloud and fog above 600m in the morning. Visibility becoming good in the afternoon with cloud lifting and breaking.

Temperature: **Glens:** Plus 8C falling to 2C after dark.
At 800m: Plus 3C falling to Minus 1C.
Freezing level: Above summits, falling to 800-1000m, then 500m in evening.
